

## Why **SUNRISE ROMA** Louvered Pergola is the Best Choice for You

When purchasing a louvered pergola, several key factors should be considered, and here's why SUNRISE ROMA louvered pergola becomes the top choice :

# 1. Plug-and-Play Design :

Many components are pre-installed at the factory, eliminating the need for professional tools and installation.

In contrast, other louvered pergolas, due to their complex structure, may require professional installers, incurring up to approximately \$1,000 per person per day for professional installation.

## 2. Tilted Louvered Roof Design :

Prevent Water Accumulation, ensuring that water naturally flows to the sides, preventing central water pooling and leakage. It's important to note that most louvered pergolas on the market use a common horizontal louvered design, which can lead to central water pooling and reduced effectiveness.

### 3. Deep Drainage System :

Ensures excellent waterproof performance through efficient drainage along all four edges of the roof, ensuring rapid water runoff. This addresses common issues with other louvered pergolas, such as inadequate drainage systems or shallow gutter systems causing water overflow.
